An idea was
BORN

While sitting at the
back bench of the
computer lab

2018

Got hands on
multiple
state projects
Grabbed our 1st
International
Project

2019

Team CANVAAS
Beginning CANVAAS
was
the dream of one...
Now it began to grow
with the dreams of
two.

2020

Did projects with
the
Govt. of INDIA
Began our research in
the field of Education

2021

Exploring new ideas
amid the Pandemic
with a Lifelong
Goal

2022

Grew to an
awesome team of
12 Members
Expaded our branch in
multiple Countries

CANVAAS SERVICES

Website Design & Development

Web presence has become an essential part in the contemporary world to keep your business rolling. A website comes as the true reflection of your business offering not only the information of your business, but also about your style of working. Hence we create your website with complete dedication and zeal, using the most technically advanced web design & development techniques.

Software Development

We develop software to best meet your business objectives of ensuring long-term value. Our technical and management teams have a series of past achievements to their name and we believe in manifesting a culture to promote professionals with a high need for achievement, and a desire for excellence. With the scalability and flexibility to support long-term growth, hence providing a well planned, strong and sustainable software for the long run.

Android/iOS App Development

Our team designs the user-friendly apps for the effective and impressive working. We conceptualize the data in a systematic way for constructive working. We have set a benchmark in matching the client's expectation. Our team is specialized in making world-class apps in the market and have best knowledge and ability to develop any kind of app.

SEO/ Digital Marketing

The most effective way to get more visibility of your website and app is via SEO and Digital Marketing. SEO is the process of creating a set of tools and best practices that help websites reach higher search engine rankings. The goal of SEO is to increase the number of organic visits (not paid) from search engines. Our SEO team aims on getting organic traffic on your portal.

Desktop App Development

Desktop based applications are very useful for projects which are completely desktop based for specific users and they also get better security. Desktop applications are faster and more responsive than their web counterparts. Many of them do not need to rely on internet connectivity to run. So, they're less affected by slow internet speeds. Mainly desktop apps will always run at the speed and quality that your machine allows.

Email/SMS Marketing

Every company needs to keep up with the times if they're going to effectively engage their audience and get the results they need. SMS is still relatively new to the game, but has the potential to drive significant ROI. It's a particularly effective channel to communicate personalized offers, event updates, or time-sensitive information. Given the popularity of mobile devices, it's no surprise that SMS and email marketing can prove to become a powerful combination.

WE ALSO OFFER
